Funding & Sponsorship

ALPHA is independently maintained by **Adonis Jimenez (@donny-devops)**.

How sponsorship helps

Area	Use of funds
Live runtime	DAG executor, A2A bus, MCP client integrations (see ROADMAP.md)
Security	Independent review of zero-trust and post-quantum implementations
Infrastructure	CI minutes, hosting for the public demo, LLM API credits for evals
Documentation	Tutorials, templates, and agent-card examples

Ways to support

- **GitHub Sponsors** — via the Sponsor button (configured in `.github/FUNDING.yml`)
- **Consulting & collaboration** — agentic infrastructure, post-quantum migration, DevOps: adonis-jimenez@outlook.com
- **Contribute** — code, docs, and issue triage count too; see CONTRIBUTING.md

Sponsorship does not grant control over the roadmap or security disclosure process; see GOVERNANCE.md.
